

AKERON MP

AKERON MP SHOOTER'S HAND TRAINING DEVICE

CONTINUOUS TRAINING ON A GAMING CONSOLE LIKE SIMULATOR

Purpose of this simulator is to drill the shooter using the AKERON MP weapon system Man Machine Interface (MMI). This hand held simulator allows to train any time, any places and improve knowledge and drill of the weapon system, using configuration menus and fire modes. Getting and keeping reflex actions using the simulator is made possible thanks to :

AN ERGONOMY VERY SIMILAR TO THE AKERON MP WEAPON SYSTEM.

- Rugged MMI with 8" display of simplified situations and target engagement, and complete AKERON MP icons and symbols.
- Observation handle (left) and shooting handle (right) coming from the weapon system.

AN APPLICATION SOFTWARE OFFERING TWO DIFFERENT EXERCISES.

- Navigation into the AKERON MP menus and sub-menus to perform the relevant functions randomly asked by the exercise. All actions have to be performed in allocated time slot.
- Missile guidance with in flight target reallocation. Moving targets are randomly displayed and must be designated on time.

THIS SIMULATOR PERFORMS

- Low cost initial training of the AKERON MP shooter on weapon system man machine interface.
- AKERON MP shooter skill maintenance, by daily practice of the simulator.
- Garrison or in operation training

This individual trainer is complementary of SET AKERON MP, as it offers only hands training on simplified firing situation. It can be provided with tactical transportation case.
