

AKERON MP

ADVANCED SIMULATION

The AKERON MP GTS meets the needs for training and firing technique improvement. It offers Armed Forces a virtual intuitive instruction environment replicating all functions of the AKERON MP missile. It includes a replica of a firing platform mounted on the original weapon tripod and connected to an instructor station for implementation and monitoring of training exercises.

PERFORMANCES

- Replicated firing platform
- 3D environment for training (multiple scenario generation tool)
- Accurate display and reproduction of the weapon system with all operating modes
- Recording tool (data backup) and replay function for analysis and improvement
- Network operable
- 1-6 simultaneous users

MISSION

Enable Armed Forces to build up appropriate firing skills for the new AKERON MP missile. GTS lets instructors create, monitor and analyse the exercises. It eases the adaptation to the original weapon system, improves and consolidates skills.

TECHNOLOGY

Powerful and intuitive 3D environment for increased realism.

INFOS

The AKERON MP GTS uses elements of the AKERON MP missile interface with a choice of ground conditions settings for increased realism and full simulation.

GDI'S ASSET

GDI Simulation provides you with a team of experts offering you multi-services solutions. MRO assistance (maintenance, repair, and overhaul) is specifically conceived to assist you on-site before, during and after Armed Forces exercises.

SUPPORT INCLUDES:

- À la carte instruction
- Assistance throughout training sessions
- Support to garrison training exercises
- User technical assistance
- Preventive and curative maintenance of our simulators
