

VSR

VIRTUAL SHOOTING RANGE SIMULATOR (VSR)

The Virtual Shooting Range Simulator allows you to safely learn how to manipulate and set-up a real weapon and emphasizes the precautionary measures related to weapons dangerousness.

MISSIONS

Weapons initiation and awareness

Acquire the right skills on multiple targets and **practice** with your weapon

Reinforced teaching

Develop and improve your marksmanship skills (reflexes, shooting in self-defense over any distance)

Setting

Indoor/outdoor day and night scenarios

AIMS

Provide an **immediate answer** to the ever-growing demand of Security Forces for training

Gain a **technical and postural experience** at your own pace, based on your know-how and life skills knowledge

Provide a **quality training 24 hours a day** for up to **6 shooters** with extra features on demand

GDI'S ASSET

- Simulation kit adaptable to different type of weapons: handguns and long guns
- Familiarization and manipulation in all respects identical to the real weapon (recoil simulation...)
- Educational and intuitive tool with adjustable exercises for a progressive and efficient training
- Full analyze of the shooting session and monitoring of your progress
- Inexpensive solutions to lower your training costs
- Environmental friendly (no shooting waste)

MBDA
MISSILE SYSTEMS

GDI SIMULATION

ADDITIONAL FEATURES

Learn how to adequately **ANALYZE** a given situation (assaulting, hostage-taking...) and act in compliance with the regulatory framework

OPTIMIZATION

of your strategy within a dynamic scenario (assaulting, protection of civilians, communication between team members)

EVOLUTIONARY
SIMULATOR
AVAILABLE IN
2 CONFIGURATIONS
«**STATIONARY**»
OR «**MOBILE**»
WITH AN
INTUITIVE
ERGONOMICS

Upcoming feature

A complementary feature will allow you to:

- Evolve within your own scenarios*
- Train your behavioral skills in full immersion*
- Set up any type of situation your team will face on the field*
